Health Disparities In the United States: Social Class, Race, Ethnicity, and the Social Determinants of Health (on hoopla)

Donald A. Barr, M. D., Ph. D.

The health care system in the United States has been called the best in the world. Yet wide disparities persist between social groups, and many Americans suffer from poorer health than people in other developed countries. In this revised edition of Health Disparities in the United States, Donald A. Barr provides extensive new data about the ways low socioeconomic status, race, and ethnicity interact to create and perpetuate these health disparities. Examining the significance of this gulf for the medical community and society at large, Barr offers potential policy- and physician-based solutions for reducing health inequity in the long term.

Just Medicine: A Cure for Racial Inequality in American Health Care (on hoopla)

Dayna Bowen Matthew

Health disparities have remained stubbornly entrenched in the American health care system. In Just Medicine, Dayna Bowen Matthew finds that they principally arise from unconscious racial and ethnic biases held by physicians, institutional providers, and their patients. Implicit bias is the single most important determinant of health and health care disparities.
